Crkva Rotonda - Ošlje

Crkva „Rotonda“ je ruševina osmeroapsidalne kružne građevine s narteksom (monumentalnim prilazom) koja se može smjestiti u vrijeme između 9 i 11 st. Rotonda je jedinstvena građevina, vrlo rijetka u povijesti arhitekture vremena kojem pripada. Iznimno je osebujna sa osam apsida u kružnoj osnovi. Po konstrukciji zida i prostora, dakle po jačini i debljini zidova zaključuje se da su oni nosili jednu višu građevinu, po svemu sudeći zvonik. Za sada je, na južnom Jadranu, ova crkva usamljeni primjer predromaničkog korpusa osmerolisnog tlocrta, nad kojim se nekad uzdizao zvonik. Postoji legenda u vezi ove crkve da su u njenoj blizini zakopana zlatna zvona.
